

STILL PRETTY AT 47

It seems Demi Moore, 47, has discovered the fountain of youth, because the star claims reports that she has had more than \$200,000 worth of plastic surgery are “completely false.” She asserts, “I don’t like the idea of having an operation to hold up the aging process... I prefer to be a beautiful woman of my age than try desperately to look 30.”

Plastic surgery expert Dr. Norman Rowe thinks Demi opted for “natural face-lift” results by way of Botox, fillers and laser skin resurfacing. “Demi likely filled in her nasolabial folds with fat, which yields a more natural appearance,” Dr. Rowe tells *In Touch*. He says the altered photo is a more accurate depiction of a woman in her age range.
